Inspection Result: Pass

PASS: 0-49 points RE-INSPECTION REQUIRED: 50-109 points CLOSED: 110+ points Observed Violations (See additional pages if necessary)

**23.** Proper date marking and disposition

This is a Priority Foundation item

3-501.17 - Ready-to-Eat TCS Food, Date Marking (Pf)

Observation: In the downstairs walk-in cooler, an opened jug of milk was found without an opening date mark. Staff stated it was opened some time last week when they made scones as a one-off.

-Ready-to-eat foods that are held refrigerated for more than 24 hours must be clearly marked with the date the product packaging is opened or the date the product is made. These foods must be consumed, sold, served or discarded within 7 days to control exposure to Listeria monocytogenes bacteria.

Correct by 02/22/2024

## 24. Time as a Public Health Control; procedures and records

This is a Priority item 3-501.19 (A), (B)(2), (C)(2) and (3) - Time as a Public Health Control, Written Procedures and Identification (Pf)

Observation: Establishment leaves cooled, cooked, fried and baked chicken in baskets over fryer oil. Staff stated they will hold the chicken there for 2 hours and will then be discarded. When they are used for service, staff will reheat the chicken for an order back up to 165F.

-To use time rather than temperature to control the growth of microorganisms, written procedures must be developed and utilized. The plan must indicate how the food will be marked when it is to be removed from temperature control, how long the food is to be held out of temperature, and must specify the food will be discarded once time has expired. Develop required written procedures for review.

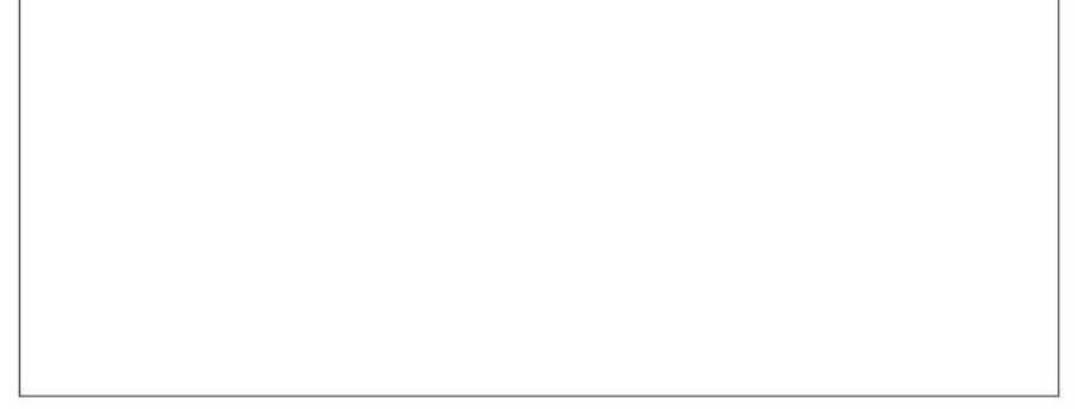

Correct by 02/26/2024

**38.** Insects, rodents and animals not present This is a Core item 6-202.15 - Outer Openings, Protected

Observation: The back door to the kitchen was found improperly closed and slightly open to the outside.

-Door was closed as requested. Ensure all doors, windows, and other openings without screens remain properly closed at all times to prevent the entry of insects, rodents, and other pests.

(Corrected on Site)

General Comments

## **GENERAL COMMENTS**

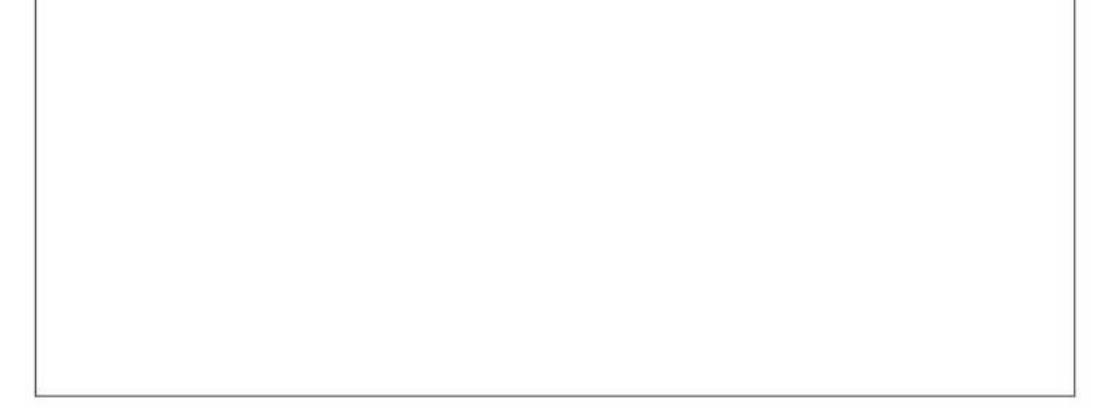

A retail food re-inspection was conducted and the following was noted:

-Proper cold holding for required potentially hazardous foods at or below 41F

-Proper hot holding for required potentially hazardous foods at or above 130F

-Appropriate cooling of cooked foods was observed

-Dishwashing machine was found with an appropriate concentration of chlorine between 50-200 ppm -Establishment is undergoing a HACCP plan review with the Department regarding their kimchi. Until approved by the department, the kimchi must be stored at cold holding temperatures at or below 41F. Kimchi was found properly cold holding at the time of re-inspection.
