Inspection Result: Re-Inspection Required

PASS: 0-49 points RE-INSPECTION REQUIRED: 50-109 points CLOSED: 110+ points

Observed Violations (See additional pages if necessary)

15. Food separated and protected

This is a Priority item

3-302.11 (A) (1-2) - Raw Animal Food- Separation, Packaging, and Segregation (P)

Observation: Cartons of liquid eggs were observed over ready-to-eat foods in the 2 door reach in cooler in the back storage area.

->Keep raw animal foods separate and below produce, prepared foods and other ready-to-eat foods to prevent cross contamination.

Correct by 09/06/2023

16. Food contact surfaces; cleaned and sanitized

This is a Priority item

4-602.11 (C) - TCS Foods - Cleaning Frequency (P)

Observation: Staff stated that the cutting board attached to the sandwhich make table is sanitized at the end of the night. Cutting board is a food contact surface and needs to go through the wash, rinse and sanitize process at least every 4 hours.

->In use equipment and utensils such as cutting boards, slicers, knives, and tongs, held at room temperature, must be washed in a detergent solution, rinsed and then sanitized (50-200 ppm chlorine/150-400 ppm quaternary ammonia) at least once every 4 hours to prevent accumulation of food residue and the growth of microorganisms. Set up a schedule to ensure equipment and utensils are pulled to clean and sanitize every 4 hours.

22. Proper cold holding temperatures

This is a Priority item

3-501.16 (A) (2) - TCS Food, Cold Holding (P)

Observation: Quiche (53F) measured improperly cold holding in the upper section of the glass display cooler. Staff stated quiche had been placed in the cooler greater than 4 hours prior. Half and half measured improperly cold holding at 43F in the lower section of the cooler. Upper section of the cooler measured 52F. Lower section of cooler measured below 41F.

- -> Adjust/repair refrigeration equipment to maintain foods at less than 41 F.
- ->Do not use refrigeration unit to store potentially hazardous foods until it has been adjusted/repaired to hold less than 41 F.
- *Quiche was discarded as requested. See voluntary condemnation agreement. All TCS items were relocated from the cooler as requested.

Cut lettuce (49F) in a plastic container measured improperly cold holding in the top of the sandwich make table. Cut lettuce container was placed on top of the wells in the table. Staff stated lettuce was placed in the cooler less than 3 hours prior. Cut tomatoes (45F) measured improperly cold holding in the top portion of the make table. Cut tomatoes were prepared 3 hours prior.

*Cut lettuce was relocated to the 2 door upright reach in cooler to cool as requested.

Cooked chicken breasts (47F) measured improperly cold holding in the 2 door reach in cooler. Staff stated items had been placed in the cooler last night.

Observed Violations (See additional pages if necessary)

*Chicken breasts were discarded as requested. See Voluntary Condemnation Agreement.

->Cold hold foods below 41 F to prevent the growth of microorganisms.

23. Proper date marking and disposition

This is a Priority Foundation item 3-501.17 - Ready-to-Eat TCS Food, Date Marking (Pf)

Observation: Hard boiled eggs dated 8/29 were observed in the glass display cooler past their 7 day limit.

- ->Proper date marking is day of preparation (Day 1) + 6 additional days = 7 day total hold time.
- ->Ready-to-eat foods that are held refrigerated for more than 24 hours must be clearly marked with the date the product packaging is opened or the date the product is made. These foods must be consumed, sold, served or discarded within 7 days to control exposure to Listeria monocytogenes bacteria.

*Eggs discarded as requested. See Voluntary Condemnation Agreement.

24. Time as a Public Health Control; procedures and records

This is a Priority item

3-501.19 (A), (B)(2), (C)(2) and (3) - Time as a Public Health Control, Written Procedures and Identification (Pf)

Observation: Establishment stated they are using time as a public health control for caprese croissants. Croissant was not marked with the time it was removed from temperature control or discard time and written procedures were not available.

- ->To use time rather than temperature to control the growth of microorganisms, written procedures must be developed and utilized. The plan must indicate how the food will be marked when it is to be removed from temperature control, how long the food is to be held out of temperature, and must specify the food will be discarded once time has expired. Develop required written procedures for review.
- ->Foods must be marked with the time they are removed from temperature control or the time the product is to be discarded. Foods must be served or discarded within 4 hours.

*Croissant discarded as requested. See Voluntary Condemnation Agreement.

General Comments
GENERAL COMMENTS
A routine inspection was conducted with the following noted:
Good hand washing observed. Proper glove and utensil use observed. Signed employee illness policies provided.

General Comments **VOLUNTARY CONDEMNATION Disposed Items Disposal Method Value Comments** container of hard boiled eggs \$ 1.00 past 7 day date marking limit discarded into the trash \$ 5.00 improper time as a control use caprese croissant discarded into the trash quiche \$ 30.00 improper cold holding discarded into the trash 4 chicken breasts discarded into the trash \$ 10.00 improper cold holding
