What you need to know about...

Your building water system and *Legionella*

How to assess your building to protect guests and staff:

- ☐ Complete this short worksheet to see if your building is at high risk for *Legionella* growth:
<https://www.cdc.gov/legionella/wmp/toolkit/wmp-risk.html>
- ☐ Learn the basics of a water management program:
<https://www.cdc.gov/legionella/wmp/overview.html>
- ☐ Reach out with questions or concerns: Legionella.Health@tn.gov

What is *Legionella*?

Legionella are bacteria that can cause a serious lung infection called Legionnaires' disease. People can get sick when they inhale water droplets that contain the bacteria.

How does *Legionella* affect building water?

Legionella bacteria grow naturally in the environment and in water. They can also grow in building water systems. Buildings with large water systems, like hotels, may be more likely to grow *Legionella*. If the bacteria are present, they can be spread through aerosols produced by: hot and cold water systems, showerheads, decorative fountains, hot tubs, cooling towers, and more.

Why should you care?

Legionella may grow and spread in hotel water systems. Hotels often have a large number of visitors and numerous *Legionella* outbreaks have occurred at hotels. From 2016 to 2017, there were 134 illnesses related to two outbreaks at Tennessee hotels.

What can you do to prevent *Legionella*?

You can protect your guests and staff by assessing your water system and learning about water management programs. Using a water management program can help identify hazards in your water system and prevent the growth and spread of *Legionella* bacteria.

Clean Up & Disinfect For **NOROVIRUS** A STOMACH BUG

Act fast! Clean up any vomit or diarrhea immediately.

Only use hot water & bleach if fabric laundering directions permit

*If using regular strength bleach (5.25%), increase the amount of bleach to 1 cup.

Any vomit or diarrhea may contain norovirus and should be treated as though it does.

Cualquier vomito o diarrea puede contener norovirus y debe ser tratado como si lo hiciera.

Toute vomissure ou diarrhée peut contenir un norovirus et doit être traitée comme si elle en contenait.

任何呕吐或腹泻都可能含有诺如病毒，治疗时应视为含有诺如病毒处理。

Scientific experts from the U.S. Centers for Disease Control and Prevention (CDC) helped to develop this poster. For more information on norovirus prevention, please see <http://www.cdc.gov/norovirus/preventing-infection.html>.
