What you need to know about...

# Your building water system and *Legionella*

## How to assess your building to protect guests and staff:

- ☐ Complete this short worksheet to see if your building is at high risk for *Legionella* growth:  
<https://www.cdc.gov/legionella/wmp/toolkit/wmp-risk.html>
- ☐ Learn the basics of a water management program:  
<https://www.cdc.gov/legionella/wmp/overview.html>
- ☐ Reach out with questions or concerns: [Legionella.Health@tn.gov](mailto:Legionella.Health@tn.gov)

## What is *Legionella*?

*Legionella* are bacteria that can cause a serious lung infection called Legionnaires' disease. People can get sick when they inhale water droplets that contain the bacteria.

## How does *Legionella* affect building water?

*Legionella* bacteria grow naturally in the environment and in water. They can also grow in building water systems. Buildings with large water systems, like hotels, may be more likely to grow *Legionella*. If the bacteria are present, they can be spread through aerosols produced by: hot and cold water systems, showerheads, decorative fountains, hot tubs, cooling towers, and more.

## Why should you care?

*Legionella* may grow and spread in hotel water systems. Hotels often have a large number of visitors and numerous *Legionella* outbreaks have occurred at hotels. From 2016 to 2017, there were 134 illnesses related to two outbreaks at Tennessee hotels.

## What can you do to prevent *Legionella*?

You can protect your guests and staff by assessing your water system and learning about water management programs. Using a water management program can help identify hazards in your water system and prevent the growth and spread of *Legionella* bacteria.

# Thinking about Remodeling your Public Swimming Pool?

**Call your local health department first!**

Rule 1200-23-5.03 (2) (a) of the Tennessee Public Swimming Pool regulations states that **“no person shall begin construction of a public swimming pool or shall alter or reconstruct any public swimming pool without first having submitted plans and specifications to the Department for review and having received approval.”**

If you plan to remodel, convert, or do any alteration to your pool in the future, contact the health department **FIRST!**

Failure to contact the health department may require expensive and time-consuming changes.

Call your local county health department and ask for the Environmental Health Program. Contact information for all local health departments in the state can be found at [this link](#).

Or, email [geh.health@tn.gov](mailto:geh.health@tn.gov) and provide the name and address of the pool you are planning to construct or remodel, and we will have the EHS reach out to you.
